PROFESSIONAL SUMMARY

UX/UI Designer and Front-End Developer with 4+ years of experience across insurance, AI-driven platforms, and SaaS products, with a foundation in Industrial Design that shapes how I think about form, function, and user behavior. I bridge the gap between research and execution, from conducting user interviews and usability testing to shipping high-fidelity designs in Figma and building in code. My work is grounded in real user problems, not assumptions.

RELEVANT EXPERIENCE

UI Designer (Internship)

Oct 2025 – Jan 2026

Workland

Montreal, Canada

- Redesigned core ATS workflows for ATLAS (Talent Experience Management System used by SMEs to government entities), cutting cognitive load and improving efficiency for teams managing 100+ active requisitions
- Architected multi-stakeholder interfaces serving recruiters, hiring managers, and candidates by balancing enterprise security with SME usability across applicant tracking, CRM, and automated campaign management
- Shipped scalable design system components that improved recruitment velocity for 30+ enterprise clients, from Boolean search to chatbot pre-screening and third-party HR integrations

AI Web UX/UI Design Consultant

May 2024 – Jan 2025

Vosyn

Toronto, Canada

- Partnered with Product, AI, and Content teams to design user-centric interfaces for AI-driven web applications, ensuring seamless collaboration from concept to launch
- Participated in user testing and A/B testing sessions to validate design decisions, documenting findings that directly shaped UI/UX improvements
- Applied end-to-end UX methods (user research, journey mapping, prototyping, design systems) to translate user behavior data into intuitive, high-impact designs

UX/UI Design Lead

Jun 2022 – Apr 2024

Clarion Insurance Pvt. Ltd.

Ahmedabad, India

- Rapidly prototyped solutions and designed UI/UX for multiple insure tech apps for Android & iOS, resulting in a 25% increase in user engagement
- Revamped the company's existing website, impacting around 10,000+ customers in India
- Managed and led a team of 5 designers and 20 developers, fostering a collaborative environment
- Conducted user surveys, interviews and usability testing for SAAS B2B platforms, leading to product improvements
- Implemented Heuristic evaluation and provided actionable recommendations, enhancing product usability
- Translated business and stakeholder needs into design executions using Figma, enhancing user engagement by 15%

EDUCATION

Humber College Institute of Technology & Advanced Learning

Jan 2025 – Dec 2025
